

FALEGNAMERIA NAUTICA, REFITTING,
COPERTE IN TEAK, ARREDAMENTI INTERNI ED ESTERNI

ANTARES 

About us

The Antares company has a long term experience in the nautical woodwork specializing in the restoration of internal and external fitting, decks made in teak and carpentry.

A balanced mix between the tradition of carpenters and the modern technologies, but above all a great passion for boats and the sea which led Giovanni Bellavigna and Carol Petek, the two managers of Antares, to form a team able to satisfy the services for the nautical branch.

Besides the restoration of vintage boats, our company carries out warranty services and/or complete refitting on M/Y and S/Y for the main shipping yards such as Perini Navi, Cantieri San Lorenzo, Azimut, Ferretti Group etc.

Besides the restoration sector, building masts, boom and planking, the aim of our company is to specialize in the service, both for the shipping yards and for the ship owner in order to guarantee a full customer service from the purchase in the shipyards and whatever service is needed.

We offer our services not only in our branch but, on request, we are available to carry out our service in small harbours and nautical structures providing you with the same professional service and efficiency.
